## Innovative concepts for the photovoltaic sector

**SOLAR safe policy**  
for traders and installers

**Inform yourself!**  
[www.wiass-pv.com](http://www.wiass-pv.com)

## The problem:

High values – many risks

### Damages before and during the construction phase:

- Theft
- Fire
- Stroke of lightning
- Sabotage
- Vandalism
- Storm
- Hail
- Assembly faults
- Accident with transport means
- Non- or false delivery
- Damages during transport
- Breakage, bending, dents
- Damages to the packaging

#### However also:

Consequential and financial losses to goods owing to damages during transport

## The solution:

WIASS solar-safe-policy

### Special features:

- Cover for procurements and shipments
- Interim storage up to 60 days
- Tools in the own vehicle
- Cover for consequential and financial losses to goods during the transport
- Combined transport and assembly cover
- Consistent insurance cover from the manufacturer up to the readiness for operation, including storage risk
- Night-time cover for tools
- Favourable premiums

Worldwide cover possible!
